Art Unit: 1745

**NICKEL ELECTRODE FOR ALKALINE STORAGE BATTERY AND METHOD OF
MANUFACTURING THE SAME**

Examiner: Yuan

S.N. 09/813,998

Art Unit: 1745

December 30, 2002

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 2, drawn to a nickel electrode for an alkaline storage battery, classified in class 429, subclass 223.
 - II. Claims 3 and 4, drawn to a method of manufacturing nickel electrode, classified in class 29, subclass 623.5 and 623.1, respectively.

The inventions are distinct, each from the other because of the following reason:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). As admitted in the subject matter of the present claims, the nickel electrode can be fabricated by two distinct processing procedures as recited in claims 3 and 4, respectively.
3. If invention II is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention.

Art Unit: 1745

II-1, Claim 3, drawn to a method of manufacturing nickel electrode wherein a porous substrate is filled with a main active material, classified in class 29, subclass 623.5.

II-1, Claim 4, drawn to a method of manufacturing nickel electrode wherein a porous substrate is filled with a main active material having a compound layer, classified in class 29, subclass 623.1.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims directed to invention II are generic.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1745

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dah-Wei D. Yuan whose telephone number is (703) 308-0766. The examiner can normally be reached on Monday-Friday (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan, can be reached on (703) 308-2383. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.
